PERSONAL DATA

Hello, my nickname is Kay. I'm a Mid-level Frontend Developer with 3 years of experience building scalable, user-focused web applications using React and Javascript and Typescript. Experienced in translating UI/UX designs into clean, maintainable code, identifying and fixing complex bugs, and collaborating with cross-functional teams.

EDUCATION

2017
Bachelor of Technology (Business Computer) at Thonburi Commercial College

TECHNICAL SKILLS

- HTML
- css, scss
- **Languages:** JavaScript, TypeScript
- **Frameworks & Libraries:** React, MUI, Ant design, mobiscroll, styled-component
- **State management:** Redux toolkit, Mobx, Jotai, Recoil
- **Tools & Collaborations:** GitHub, Vite, NPM, Yarn, Click up, Slack, AWS (basic: S3, CloudFront)
- **API:** REST API, Axios, Fetch
- **Methodologies:** Agile, scrum

WORK EXPERIENCE

Mar 2022 – Present
Frontend Developer
📍 **Make life better solutions | Bangkok, Thailand**

PROJECTS

E-commerce Multi-Country Platform

- Developed a scalable e-commerce platform supporting multiple countries with country-specific UI, content, and configurations.
- Implemented dynamic layouts and feature toggles based on regional requirements.
- Integrated multiple payment methods, including credit cards, bank transfer (bank wire), and QR payment.
- Implemented credit card alias/tokenization to securely save customer payment methods for future transactions.
- Collaborated with backend teams to integrate localized pricing, promotions, payment flows, and APIs.

Admin Management System

- Built an internal admin system to manage website configurations and content.
- Implemented enable/disable feature controls to allow non-technical teams to manage website sections without code changes.
- Improved operational efficiency by reducing manual deployments for configuration changes.

E-commerce CMS & Shopify Customization

- Developed e-commerce stores using Shopify and created custom plugin extensions to extend Shopify functionality.
- Customized storefront behavior and UI using Liquid.js to meet specific business requirements.

Queue Management Web Application

- Built a real-time queue management web application allowing users to receive and select service queues.
- Implemented a live queue display and auto-running queue system using WebSocket for real-time updates.
- Ensured smooth real-time synchronization between users and display screens.

Backend Automation & AI-Assisted Data Processing

- Developed a backend system to automatically extract daily customer order data from the database.
- Integrated with AI (ChatGPT) to intelligently parse and separate customer address information.
- Generated Excel files programmatically and automated email delivery.
- Scheduled automated jobs using AWS cron jobs to run the process daily.
